DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 10 and 14 - 17, drawn to a magnetic read head using a gap fill layer comprising aluminum oxide, aluminum nitride and/or mixtures thereof, classified in class 428, subclass 692+.
 - II. Claims 11 - 13, drawn to a gap fill material comprising aluminum oxide and a compound with a thermal conductivity higher than aluminum oxide, classified in class 75, subclass 235.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claim 1 provides evidence that the combination does not require a head gap fill material comprising aluminum oxide mixed with a compound with a higher thermal conductivity than aluminum oxide. The subcombination has separate utility such as dielectric material with controlled thermal conductivity.

Art Unit: 1773

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. No telephone call was made to applicants due to the complexity of the restriction requirement. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
